10	f	weasber,	feet	The many friendly Aspects that happens this Month would argue very friendly agreement among some great and grand council or councils in several parts of Europe. Some Proposals Peace seems to be in agitation, Probably with the Swedes and Muscovites. Some News from Spain or Portugal not very pleasing, perhaps some damage by Sea. Great endeavours in many countries to make Parties and confederate, concerning high designs in agitation near these times, concerning matters of no small moment which have been long controverted and debated, and not near a happy conclusion. New arrives from Italy, and we presume from Rome it self, of some accidental consternation amongst those People. And I do suppose there fear may daily Encrease.

4	g	warm wind,	knees	We may justly expect this Month, to be in some measure sensible more or less of the Effects of those notable Con- figurations of the Planets, which happened in the last, but they will be in Part Ele- vated by those in this cer- tainly. Now matters of great Consequence are in agita- tion, the Sun is Eclipsed the 11th day just at Sun ri- sing in the very beginning of Aries, but Invisible to us, yet visible and remarkable too, to those that Inhabit in some Southern Parts of the World. Jamblicus saith, ' That when the Sun is Eclipsed in the first face of Aries, it Por- tends the sudden and fre- quent Motion of Armies, Continual Expeditions, As- saults and Batteries, with many Tumults, Seditions, and Controversies. The Moon is Eclipsed visible the 25th, at Five a Clock in the Morning. I shall speak of it more in the next Month.

Mutual Aspects and
Observations.

☉	in ♊	and ☿	in ♍	in ♈	da.
☿	in ♋	and ☽	in ♍	in ♈	5
☽	in ♍	and ☿	in ♍	in ♋	18
☿	in ♍	and ☽	in ♋	in ♈	19
☽	in ♋	and ☿	in ♋	in ♋	23
☿	in ♋	and ☽	in ♋	in ♋	23

At the New Moon, we have
Aries Ascending our Horizon,
 and *Mars* therein in square
 to *Venus*, in *Cancer* in the 10th.
 I fear there are some, if not
 many Male-contented Spirits
 amongst us, Especially in the
 North-Part of *Great Britain*.
 I wish they may not procure
 harm to themselves. Much
 discord seems to be towards
Italy or *Rome*, or Places where
 Councils are Convened toge-
 ther. Dissatisfied Judgments
 are very Active to Promote
 what mischief possible they
 can. Some very good News
 seems to arrive about this
 time of some Considerable
 Action, performed South or
 South-Eastward from us. Our
 Army seems to be very for-
 ward, God grant them good
 Successes, for I doubt not
 their Courage in Pushing
 Forward.

Last quarter 1 day, 9 hours 39 minutes afternoon.

New Moon 9 day, 2 hours 14 minutes morning.

First quarter 15 day, 5 hours 22 minutes afternoon.

Full Moon 23 day, 9 hours 20 minutes morning.

Last quarter 31 day, 0 hour 58 minutes morning.

Astrological Observations

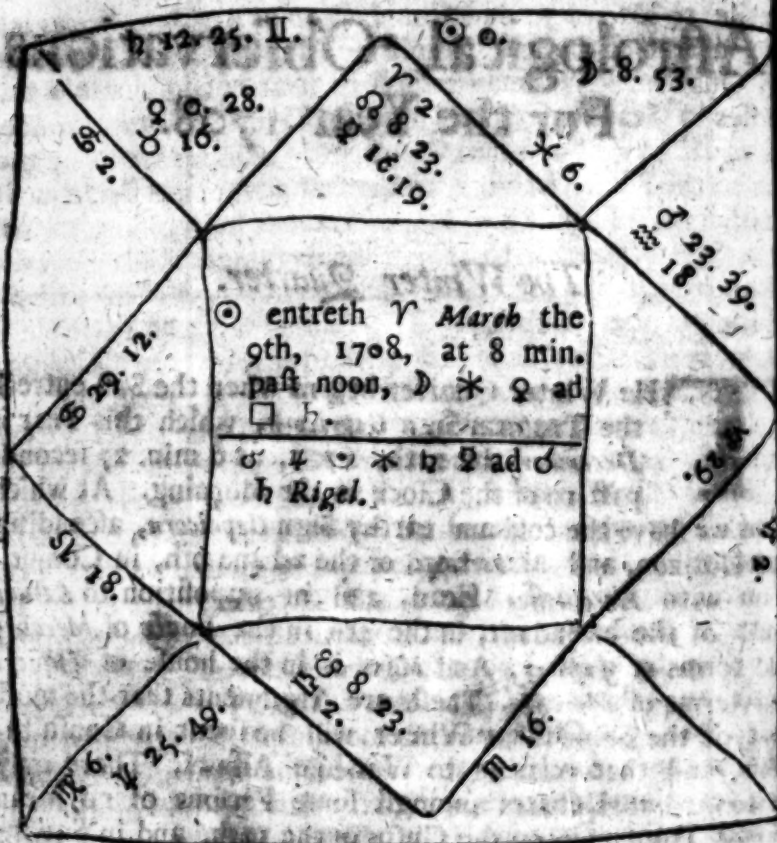

For the Year 1708.

The Winter Quarter.

THe Winter Quarter begins when the Sun entreteth the Tropical Sign *Capricorn*, which this Year is December the 11th, 1707, at 6 min. 27 seconds past 10 of the Clock in the Morning. At which time we have the cold and earthy Sign *Capricorn*, ascending our Horizon, and *Mars* Lord of the 2d and 9th, in Conjunction with *Hercules* Head, and in opposition to *Saturn* Lord of the ascendant, in the 4th in the house of *Mercury* and terms of *Jupiter*. And *Mars* is in the house of *Jupiter* and terms of *Mercury*. These are Arguments that the most part of the Subsequent Winter will be spent in Consultations, and that relating to War-like Affairs. There may be some hot Debates amongst some Persons of no mean Rank. The Sun is on the Cusps of the 12th, and in Square to *Jupiter*, Lord of the 4th. On the Cusps of the 8th, and the Lord of the 8th in the 12th. May signifie Death or imprisonment to some Person or Persons of very great and considerable Note. And some Eminent Lady meets with great Affliction. There seems to be great Preparations in many Places for the carrying on of the War the next Campaign. We may rationally Judge that about this time, we shall have very Superlative Councils, and Serious Debates of Laws, Privileges, Customs, Leagues, Alliances, Antiquities, or matters relating thereunto: A reviving of many things Acted long since. Controversies concerning

Astrological Observations

Houses, Lands, Leases, Abuse of Tenants, and such like Affairs will take up the consideration of many Sober, Judicious Persons. As also the Promotion of Church Affairs, and those Learned Persons that are concerned therein.

The Spring Quarter.

THE Spring Quarter begins March the 9th, 1708, at 8 min. past Noon; at which time the Sun enters the Equinoctial Sign *Aries*, at this Ingress the four Cardinal Signs possess the four Principal Houses or Angles, viz. *Cancer* ascends our Horizon, *Aries* culminates in the 10th, *Capricorn*

for the Year, 1708.

Capricorn in the 7th going down in the western Angle, and *Libra* in the 4th house under the earth. The Angles are moveable, and the Moon, Lady of the Ascendant, in the 9th in Sextile to *Venus*, and Square of *Saturn* in the 10th. The Sun is in Opposition to *Jupiter*, and *Saturn* in Sextile to *Mercury*, and Conjunction of *Rigel* or *Orions* left foot, a Star of the first magnitude, and nature of *Jupiter* in his Quarter. We may expect to hear of considerable bu-
sinesses by Sea, many Men moving Over-Seas to *Spain*, or *Portugal*, as well as other Countries. Armies are all in mo-
tion to the Field, striving for the first advantage by an early campaign. I wish the Allies may not be too slow, which hath often proved to their disadvantage. At the New Moon which happens *March* the 11th, at 4 min. past 6 a Clock in the Morning. The Sun is Eclipsed Invisible to us, at which time as well as at the Ingress; the 4 Cardinal Signs possess the 4 principal Angles of the heavens, but with this alteration, that in this *Aries* ascends, and *Capricorn* culminates on the 10th, the Conjunction happens just on the Cusps of the Ascendant, And first degree of *Aries*. Authors say, That when the Sun is Eclipsed in the first face of *Aries*, it signifies the sudden and frequent motion of Armies, Continual Expeditions, Assaults and Batteries, with many Tumults, Seditions, and Controversies; but as the Eclipse is Invisible to us, so I hope will the effects also. There happens an Eclipse of the Moon, the 24th of *March*, at 6 min. past 5 a Clock in the Morning. The Cardinal Signs possess the 4 Angles in this in the same manner, and almost the very same degrees, as in the last Eclipse of the Sun. There is the Dragons Head, the Sun, *Mercury*, and *Venus*, all in the Ascendant, and the Moon in the 7th, in 15 degrees of *Libra*; the beginning is the 24th day, at 53 min. past 3 a Clock in the Morning, the middle will be at 13 min. past 5 a Clock in the Morning; the end of the Eclipse at 19 min. past 6 a Clock. The total duration is 2 hours 26 min. There will be 5 digets 29 min. of the Moons body Eclipsed. Our Authors says, That when the Moon is Eclipsed in the second face of *Libra*, it signifies mischief and trouble, in some measure to be Incident, to most sort of People. There is a heavy stroke seems to light some where or other, in or about this Quarter. God Preserve

Astrological Observations

Her Majesty's Forces, together with those of the Allies, and make them Victorious: For undoubtedly there will be great Slaughter and Blood-shed, either towards the latter end of this Quarter, or the beginning of the next: In May, *Mars* is in *Aries*, and swift in motion, and in Square to *Venus* who is Lady of the 4th, at the Ingress, and hastening to a Sextile of *Saturn*, who was Lord of the 6th, 7th, and 8th, and in his Triplicity. And *Mars* strong in his own house, and in Sextile to *Mercury*, who is swift in motion, will hasten great and Extraordinary News before the Month of June be over, but I hasten to the Summers Ingress.

The Summer Quarter.

THe Summer Quarter begins when the Sun enters the Tropical Sign *Cancer*, which is this Year, 1708, June the 10th, at 28 min. past Noon; at which time, *Libra* Ascends our Horizon, and *Cancer* Culminates. On the 10th, it is something remarkable that the Cardinal Signs have possessed the four Principal Angles of heaven; at both the Eclipses and these two last Ingresses: The Moon who is Lady of the 10th, is afflicted with the Square of *Mars*, Lord of the 7th and 8th, near the Cusps of the 11th. We may Probably hear of some Eminent Person, be it Male or Female; falls under some great Affliction, if not Death. Some busie spirits strive to promote their own designs. And some are assuredly catched Napping. All the Planets are direct in their motion; *Jupiter* is in the 12th, and in Square to *Sol*, Lord of the 11th. This will in some measure hasten on the evil before mentioned: The last Square of *Saturn*, and *Mars* from *Gemini* and *Pisces*; I fear will in some measure effect the Spring, and harm the Fruits of the earth: It will also effect humane kind, by stirring up the Passions of Men to Act violence with cruelty and desire, *Mars* has been hasten-

for the Year, 1708.

g through his own house, which shews the sudden motion
Men and Armies, and great Action to attend it: The
position of *Mars* in *Taurus* in the 8th, the house of Death,
do suppose may signifie great mortality of humane kind,
either by slaughter, or some such thing; and this is so much
the more probable, by reason of the unusual double Squares
of *Saturn*, and *Jupiter* from *Gemini* and *Virgo*. God grant
that *London* may not meet with any Affliction: but doubt-
less something very remarkable will happen this Quarter in
some kind or other, to some Places under the Influence of
those constellations, where these two Superiour Planets are
Posited.

The Autumnal Quarter.

THE Autumnal Quarter begins when the Sun entereth
the Equinoctial Sign *Libra*, which this Year 1708, is
September the 12th, at 37 min. past one a Clock in the
Morning. At which time we have *Leo*, the heart of the
fiery Triplicity Ascending our Horizon, and *Aries* culmi-
nates on the 10th: *Mars*, who is Lord thereof, is in Con-
junction of *Saturn*, in *Cancer*, in the 14th. And these two
malignants in Square to *Jupiter*, and the Sun in *Libra*, in the
10th. And notwithstanding the season is so far spent; yet I
presume to suppose there may be some violence or blood-shed
near this time; and many barbarous wicked and horrid
cruelties committed. Inland Journeys will be very dange-
rous and much Robbery committed: Some Proposals would
seem to be offered for Peace, if not Treaties on foot to that
Purpose; and would seem to be in a fair way towards it,
But if I mistake not, if any such Treaties have been on foot,
it will scarcely come to any good conclusion, under such
malevolent Configurations, but rather make the breach
wider. The Sun is Eclipsed September the 3d, in 21 degrees
of

Astrological Observations

of *Virgo*. There will be one half of the Sun Eclipsed, and visible to us, if clouds hinder not, the beginning is the 30 day, 37 minutes past 6 in the Morning, and ends 31 minutes past eight; the total duration is 1 hour 54 minutes. There is another Eclipse of the Moon *September* the 18th, at 55 minutes past 8 in the Evening; it begins at 54 minutes past 7 in the Afternoon, and ends 56 minutes past Nine a Clock at Night. The total duration is 2 hours 2 minutes, it will be but a small Eclipse, there will be but 3 digets, 51 minutes of the Moon Eclipsed; which is not quite one third Part. All these things being duly considered, makes me suppose small hopes as yet of a Peace, but rather greater preparations for another Year. However the Power is in the Almighty God, to give Peace or War as he thinks fit. Whom we do implore to grant his blessing on Her Gracious Majesty Queen *ANNE*, and all her Forces by Sea or Land.

The Annual Letter

November the 1st, 1708.

From my School, at the Sign of my Lord
Gallway's Arms in *Castle-Lane, Dublin*, *Andrew Cumpsty*, Master-Gunner of Ireland,

Gentlemen,

I am your Humble Servant.

The

for the Year 1708.

The Explanation of the Almanack.

IN the first Column is the days of the Month. In the second is the days of the Week. In the third the Weather and Holy-days. In the fourth, is that part of the body that is said to be under the dominion of that part of the Zodiack where the Moon is at that time. The Fifth Column is the days of the Moons age: And to know the Moons age, look for the day of the Month in the first Column, and in the same line, in the fifth Column is the Moons Age.

The Explanation of the Tide-Table, and to find the time of High-water in any part therein mentioned.

First find the Moon's age, as before directed, and with that age enter the Tide-Table, and look in the first Column to the Left hand, under days, for the same age, then look for the Harbour in some of the Columns above, and in the Angle of meeting is the hour and minute of full Sea, or High Water, in that Harbour,

Example, I desire to know what time it will be Full Sea at *Dublin-Bar* the 15th of *June*. Look for the 15th of *June*, and in the Column of the Moon's Age, you will find the Moon to be 8 days old, then look in the Tide-Table for the Bar of *Dublin*, and in the Left hand Column for 8 days old, and in the Angle of meeting is 4 hours 54 minutes, which shews that at 54 minutes past 4 a-clock in the Forenoon it is Full Sea in that Harbour, and the like for any other.

Directions for those who know not the Characters of the Signs, Planets or Aspects, how they may know them.

The Twelve Signs.

♈, Aries. ♉, Taurus. ♊, Gemini. ♋, Cancer. ♌, Leo. ♍, Virgo. ♎, Libra. ♏, Scorpio. ♐, Sagittarius. ♑, Capricornus. ♒, Aquaries. ♓, Pisces.

The Planets.

♄, Saturn. ♃, Jupiter. ♂, Mars. ☉, Sun. ♀, Venus. ☿, Mercury. ☾, Moon. ♁, Dragons-head. ☊, Dragons-tail.

The Aspects.

♌, Conjunction. ♐, Opposition. ☐, Square. ✱, Sextile. ☌, Trine.

Advertisements.

THere is made and sold by *George Hodder* at the *Wooden Man* in *Essex-Street, Dublin*, a new contriv'd Mathematical Instrument call'd a *Quadrat*; by which you may find the Latitude of any place very readily, either by Sea or Land, without respect to the Horizon or Tables of Declination; for the complement of the greatest observ'd Altitude always gives the Latitude of the place by this Instrument. Moreover by this Instrument you may exactly find the Latitude of the place though the Sun does not shine, if you can but discern the Sun's Body. It has likewise a Table of the Sun's Declination on it self, that you may use it with (if you please) or with any other Tables of Declination. It serves as well for observing by the Stars at Night, as with the Sun by Day. You may likewise easily fit it for surveying of Land. Also it is very excellent for taking of Heights and Distances, and is a very portable Instrument. There is a Printed Book of Directions sold along with it. The Book and Instrument is now ready.

THese are to give notice to those Chappmen that travel near *Lisnegarvey* or *Strabane*, that they may be supplied with Almanacks by *Alexander Campbel*, Bookseller, of *Lisnegarvey*, and *William Love* of *Strabane*, Merchant.

A TABLE shewing the time of Full Sea, or High Water, for every day of the Moons Age, in these Places following.

Under the Days of the Moons Age in the other Column is the time of High Water.	Galway, Dingle, Baltimore, Broad-haven, Limerick, Mousehole, Flambrough, Scarbrow.	Kinsale, Cork, Youghal, Liens, Dungarvan, Torbay, Falmouth, Ramsey, Milford, Plimouth.	Waterford, Londonderry, Londy, Bristol, Hull, Weymouth, Boston, S. Malo's, Foulis, S. Powells.	At the Lizard by the Land between Mousehole & Falm. Cape-clear, Texel, Milford-ha.	Wexford, Plimouth-road, Dunbar, Orkney, Race of Portl. Clifts, Beurd. Yarm. Egmont.	Bar of Dubl. Arklo, Wicklo. Drogheda, Denisk, Holly-head, Downs, Orfordness, S. Helen	Carlingford, Strangford, Callis, Caricktergus, Cow, Harwich, Dover, Southforeland, Portlsm
